How Does the Device Work?

Training Mode

* If the vibration is off, there will be no corresponding display.

Single Method Execution Order

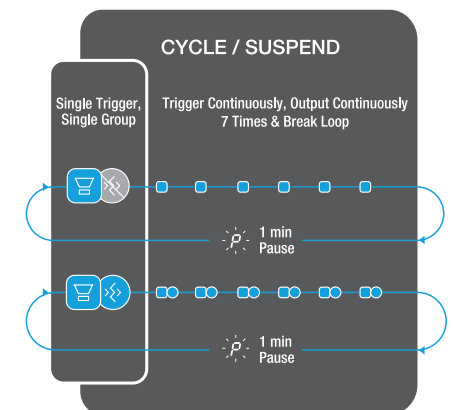

* This means that sound, and vibration do not happen simultaneously during barking. First, your dog will hear the sound, then vibration will occur.

- 5 -

How Does the Device Work?

Training Methods Combination

* For protection, there is a 1 minute pause after 7 triggers, regardless if the dog is still barking.
